## HOW TO USE THE DIAL TELEPHONE

1. Lift the receiver and wait for the dial tone—a steady humming sound.
2. Place your finger in the hole through which the first figure of the called number appears.
3. Pull the dial around, clockwise, until your finger strikes the finger stop.
4. Release the dial, allowing it to return. Do not interfere with the dial or try to "force" it on the return. If you do, your call may go astray.  
Dial the other figures, in order, the same way. In a short time you will hear a "burr—burr—burr" sound as the other telephone rings.  
If the line is busy, you will hear a fast "buzz-buzz-buzz."  
If a mistake is made in dialing, hang up for a few seconds, then dial the complete number again.

## HOW TO OPERATE A COIN TELEPHONE

On Long Distance calls from coin telephones, lift the receiver and dial Sweeny Operator. Do not deposit money on a Long Distance call until the Operator tells you to do so.

No liability shall attach to or be assumed by the Company for any errors or omissions in the compiling, printing or distribution of its directories. In order that the directory record may contain correct listings at all times, notifications of changes or errors should be given at once at the Business Office of the Company.

# Guardian of Your Home

During the day and through the darkness of the night you have a feeling of *safety and security* because of the telephone. It is an ever-watchful guardian of your home—ready to serve you in the ordinary affairs of life and in time of emergency.

The telephone would not be what it is today if it were not for the nationwide spread of telephones. A unified plan of operation has developed telephone service to its present high efficiency and brought it within the reach of people everywhere.
